QuickTreX® Professional "Five In One" Modular Crimping Tool

✔ Included

Professional "Five In One" Modular Crimping Tool For 8P8C/RJ-45, 6P6C/RJ-12, 6P4C/RJ-11, 4P4C, 4P2C/RJ-22

• Calibrated to a nominal of .237" (for most High Quality RJ connectors), while maintaining a +/- .005 tolerance.
• Meets FCC Spec 68.5
• Ultra precise and durable Zinc Alloy which supports the product for accurate results on each crimp, that is sure to last for years with continual use.
• Crowned Head™ pin arrangement accounts for flexing of the plug during the crimping process and reliably delivers evenly crimped pins.
• Crimps modular plugs in perfect and even parallel action with precise ratcheting mechanism
• Works with QuickTreX, SS, Sentinel, as well as Tyco type plugs. Will accept both types of latch locking stand offs (2 or 3) for a proper crimp of cable jacket, while maintaining the integrity of the conductors "lay".
• Plug locks in place to maintain proper position to elevate movement. This allows the tool to crimp properly over the contacts while not damaging the plastic in the latch area, leaving a good clean crimp / connection.
• Low effort crimp mechanism for less user fatigue
• Accessible release button in the event the tool needs to be open prior to a full crimp.

FlashLight PAL™ ✔ Included

No more holding a flashlight in your mouth or scrunching it between your neck and your shoulder. No more fumbling in the dark. No more being without light wherever and whenever you need it.

Unlimited Uses:
Home and Personal • Camping • Tradesmen • Emergencies • Law Enforcement • Search and Rescue • Many more

Compatibility:
The Flashlight PAL was designed mainly for LED Flashlights ranging from:
Range of Thickness from 0.75" (19mm) to 1.5" (38mm), and a Length from 4" (101 mm) to 9" (229mm) or more.

Notes on Usage:

Keep Top Flap Closed: When the flashlight is not in use, we recommend keeping this flap closed even though the side elastic panels will otherwise hold it securely. Under certain conditions (like jogging or working on heavy machinery), the flashlight could possibly fall out. Tuck in the top flap on the inside of the pouch when using the flashlight.

Lower Flap: The lower flap serves two purposes. It makes it possible to turn on flashlights that have a rear click switch without removing the flashlight from the pouch. Secondly, you can also open the lower flap when you are using flashlights that are in excess of 6" in length.

Tip: Always have an extra set of batteries on hand for emergencies.

Hazardous Conditions: Always work safely and use proper safety equipment (like eye protection) when working under potentially hazardous conditions.
